

KT-TA8/KT-TA4

Wireless tally 300-meter transmission

Long battery life

Multiple installations

Features

- Long-distance transmission, up to 1 km in an open area, and up to 300 meters in an urban environment.
- Low transmit power, no interference with other video equipment.
- High sensitivity, can not be interfered in the environment where many wireless devices work.
- $\leq 200\text{ms}$ fast response, response time $\leq 200\text{ms}$.
- The installation method is flexible and diverse, the hot shoe wrist strap is integrated, and the fixing method can be replaced freely, which is more convenient.
- Combined with the adapter card, it can be compatible with various mainstream broadcasting systems and products such as Vmix, ATEM, Datavideo and Roland etc.
- Super long battery life, built-in 2000mAh battery in the host, 700mAh battery in Tally, and can also be continuously powered by USB to cope with all day working environments.

Specifications

The Host	
Interface	DB25 Port
Communication Carrier Frequency	433MHz spread spectrum
Transmission Distance	1 km in an open area, 300 meters away from the city
Battery Specification	Built-in 2000mAh battery, can last for 20 hours

Charging Port	Micro USB
Charging Voltage	DC 5V
Recharging Current	400 mA
Generating Power	500 mW
Host Size	About 65*105*17.9mm
Antenna Size	About 171mm
Host Weight	About 0.5kg
Tally	
Indicator Light	Two-color indicator light
Installation Method	Integrated hot shoe wrist strap
Signal Indicator Status	Blue indicator light: flickering after receiving the Tally signal from the host; red indicator light: always on when the battery is not charging, and the power is less than 40%; green indicator light: always on when the battery is not charging, and the battery is less than 80%.
Charging port	Micro USB
Tally Size	36*67.3*18.8mm
Tally Weight	0.2 kg
